Assignment 1 — HTML & CSS Fundamentals

Subject: Web Development
Assignment No.: 01
Title: Designing a Basic Web Page Using HTML and CSS
Difficulty: Beginner
Submission Format: PDF / DOCX

Objective

The objective of this assignment is to understand the basic concepts of HTML and CSS and use them to create a simple, well-structured and attractive web page.

Problem Statement

HTML is used to create the structure of a webpage, while CSS is used to control its appearance and layout. A good web developer should understand how both technologies work together.

Questions

1. What is HTML? Explain its importance in web development.
2. Explain the basic structure of an HTML document.
3. Explain any **10 commonly used HTML tags** with examples.
4. What is an HTML form? Explain important form elements.
5. What is CSS? Explain its role in web development.
6. Explain the following types of CSS:
    - Inline CSS
    - Internal CSS
    - External CSS
7. Explain the following CSS selectors:
    - Element selector
    - Class selector
    - ID selector
8. Explain the CSS Box Model with a suitable diagram.
9. Create a simple **Student Registration Page** using HTML and CSS.
10. Explain how HTML and CSS work together to create a webpage.
